DETAILED ACTION

Examiner's Amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory Bernabeo on 5/28/04.

The application has been amended as follows:

Claim 3 has been amended to be dependent on base claim 1.

Claim 3, line 1, now reads, "The method of claim 1, further comprising the steps of:"

Allowable Subject Matter

2. Claims 1, 3-24, and 28-35 are allowed.

The following is an examiner's statement of reasons for allowance:

In reference to claims 1, 17, 21, 28, 30, and 33, none of the references, either singularly or in combination, teach or fairly suggest the elements of displaying a multilink providing a logical point of access to a plurality of distinct files or each of the plurality of distinct files having a respective electronic address, each being associated with the multilink, each of the electronic addresses being contained in a file at the client computer, the file containing the electronic addresses of the distinct files being

Art Unit: 2176

interpretable to display the multilink. Furthermore, none of the references, either singularly or in combination, teach or fairly suggest the element of generating a menu of options in response to a selection of a multilink.

Kenner teaches a system for providing a link to a file to a user browsing web pages where the file maps the user's IP address to a look-up table to determine which sites are "electronically close" to the user and provides the user with a list of the site addresses for the server; however, Kenner does not teach that the file containing the electronic addresses is at a client computer where it is interpretable to display the multilink. Kenner also does not teach or suggest that the files are "distinct" but rather teaches that the files are the same but at different IP addresses.

Foley teaches a portfolio file including references to a set of project files that organizes the files into portfolios; however, he does not teach a multilink.

Guenthner teaches a method of dynamically generating a webpage in response from a client, the web page having a hypertext reference identifying a linked page supported on each of a set of other servers in the network; however, Guenthner does not teach generating a menu of options from which a user can select an option. Guenthner also does not fairly teach that the file containing the electronic addresses is located at the client computer where it is interpretable to display the multilink.

Rose teaches having a plurality of formats that are available to a user. Rose presents a list of files that can be delivered from the server; however he does not teach a multilink nor does he teach that the file containing the electronic addresses is located at the client computer where it is interpretable to display the multilink.

Art Unit: 2176

Therefore claims 1, 3-24, and 28-35 are in condition of allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
